

axl 30

Build Your Own Drone Kit

Unleash your creativity and build your own high-performance drone with the axldrone DIY Kit! Designed for hobbyists, drone enthusiasts, and developers, this lightweight yet durable frame provides the perfect base for assembling a custom drone.

Features

- **Build your drone with three options**
 - From the Carbon Fiber Frame
 - Frame with Propeller, Motor & ESC
 - Full Drone Components
- **Lightweight & Durable Carbon Fiber:** Ensures strength without adding extra weight, improving flight stability and endurance.
- **Compact & Agile Design:** Ideal for various applications, including basic FPV, aerial photography, surveying/mapping and learning the fundamentals of drone building.
- **Comprehensive Package:** Includes all essential components for assembly, saving time and hassle.
- **DIY-Friendly Assembly:** Simplified assembly process suitable for both beginners and experienced enthusiasts.
- **Cost Effective/Economical:** The three printed part utilization assists with ease in individual replacement of parts if any of them is damaged or faulty.
- **Customization Options:** Build and personalize your drone to suit your unique needs and preferences.
